BUILT ON PURPOSE

YOU CANNOT SEE IT FROM INSIDE

You know this business better than anyone alive. That is exactly the problem.

You have been inside it for years. You cannot see it the way somebody sees it who has never heard your name, and that person is who decides whether to call you.

The INSIGHT is us looking for you. We go everywhere a customer would go looking. Your website. Your Google listing. Your reviews. Your social pages. Your printed material. Then we score what we found and tell you plainly.

TWO HUNDRED FIFTY POINTS

Twenty six factors across four areas. The four are not weighted evenly, and that is on purpose. Brand Identity carries the most because it is the root, and most of what gets called a marketing problem starts there.

AREA	POINTS	WHAT IT COVERS
Brand Identity	100	Your purpose, your story, who you serve, and what actually sets you apart.
Visual Style	80	Your logo, your look, and whether you look like the same company everywhere you appear.
Messaging	50	Your wording, your tagline, your offer, and how fast a stranger understands what you sell.
Online Presence	20	Where you show up, and what shows up when someone searches your name.

Every point has a reason behind it. Take one factor, what sets you apart. Zero to two means a customer could swap you for anyone in your trade. Three to four means you are claiming what everybody claims. Seven to eight means clear reasons to pick you and they are believable. Nine to ten means a real edge you can prove and a competitor would struggle to copy. No gut calls. You will see why you scored what you scored, and what a better score would take.

WHAT YOU GET

AN HONEST READ

Where you stand today, said plainly. Not a sales presentation with a score attached.

A WRITTEN REPORT

All four areas scored out of two hundred fifty, with the reasoning behind each factor.

SIX TO EIGHT NEXT STEPS

Put in the order that matters most, not the order that is easiest for us to sell.

A FOLLOW-UP MEETING

We sit down and walk you through it. The meeting is free and there is no pressure in it.

THE NEXT STEPS ARE YOURS

Take them to another firm. Hand them to your team. Do them yourself. We would rather be useful than be your only option, and an owner who fixes three things himself and comes back in a year is a better outcome than one who felt cornered.

WHO THIS IS FOR

Any owner who suspects something is off and cannot name it. Any owner about to spend real money on a website, a video, or a rebrand who would like to know the starting line first. Any advisor who wants to hand a client something useful without risking his own credibility.

WHAT IT IS NOT

It is not a free audit with a pitch attached. It is a paid product with a real deliverable. Paying for it is part of why it works, on both sides of the table.
