THE MASTERPLAN

Everything at once, all of it built from one message.

FROM \$50,000

PRODUCT BROCHURE • 2026

BUILT ON PURPOSE

YOU HAVE BOUGHT THIS IN PIECES

A logo one year. A website two years later. A video from whoever was available.

Every one of those was made by somebody who had to guess what your company is. So none of them agree, and you have paid for all of it.

The MasterPlan is the other way. One discovery, one document, and then everything built from it by specialists who were all handed the same answer.

FIVE PHASES, ALWAYS IN THIS ORDER

01 • EVALUATE

The INSIGHT, so we both know exactly where the starting line is. That matters twelve months later when somebody asks what changed. A transformation with no documented before is a transformation nobody can prove.

02 • DISCOVER AND WRITE

The Manifesto, including Verification. Nothing gets designed or filmed until it is finished.

03 • DESIGN

The full visual rebuild. Logo with every variation you need, color, type, imagery direction, and a brand book your team and your vendors can follow.

04 • PRODUCE

Photography, video, website, print, and branded items. All of it from the same source.

05 • HAND OFF

Every file and every source, plus the adoption package that keeps it in use.

WHAT GETS PRODUCED

COMPONENT	COUNT	WHAT IT IS
Brand photography	50	Shot in your building, with your people and your actual work. No stock.
Video library	11	Brand film, origin story, promotional ad, client testimonial, six short vertical pieces for social, and a case study.
Social graphics	24	With the copy already written, so posting is a decision rather than a project.
Website	20 pages	Rebuilt from the Manifesto, with the search visibility improved so people can find it.
Print and design	6 pieces	Business card, email signature, pitch deck, brochure, one pager, ad design.
Branded items	33	Because a shirt in a customer's hand is one more place your message lands.

Why the video mix matters more than the count. A single brand film solves one problem once. A library solves the ongoing problem, which is that you need something to say every week and have nothing to say it with. Six short pieces is roughly six months of a social channel.

EIGHT SPECIALISTS, ONE ANSWER

Every component is made by a different specialist, and every one of them is handed the same document. That is the entire point. The Manifesto is what makes eight specialists produce one company instead of eight opinions.

You get one accountable party across all of it. We are the quarterback. We throw the ball and we take the sack. If a partner misses, that is ours to fix and not yours to chase.

YOU OWN THE WORK

At the end you receive every file and every source, including the editable originals. That is not the industry norm and it should be. You paid for it.

IT GETS USED, NOT FILED

IMPLEMENTATION HANDBOOK

How the document gets used once we are gone.

THIRTY DAY CHECK-IN

Early enough to catch a document nobody opened.

NINETY DAY CHECK-IN

Late enough that real decisions have come up.

SIX COACHING SESSIONS

Through a partner coaching organization, built in rather than offered.

WHAT YOU HAVE TO BRING

Session attendance by the decision maker personally. Access to partners, managers, long-tenured employees, and where possible a customer. One to two days of building and people access for the photo shoot. Time on camera, because the origin story and the brand film require you in front of a lens. Timely review at three passes. Decisions made when they are asked for.

A prospect who hesitates at session attendance or at being on camera is telling us something useful about how the engagement would actually go. We would rather hear it in the first meeting.

TIMELINE AND PRICE

This runs in months, not weeks, and we will give you an honest calendar rather than a comfortable one. Price starts at fifty thousand and scales with complexity rather than the size of your company. The variable is how many people hold part of the truth and how far apart their versions are.

BUILT ON PURPOSE

Everything you say and show, built from one document,
by one accountable party, in the right order.
